

New 2009 Paragon System Checker

Along with recent updates to the Paragon system and the release of Internet Explorer v8 by Microsoft™, LPS Real Estate Group (LPSREG) has developed a new Paragon System Checker to ensure optimal settings with both systems.

The following processes are executed by the new Paragon System Checker.

1. Creates a restore point.
2. Prompts user to delete temporary internet files
3. Internet Explorer Settings:
 - a. Sets temporary internet files space to 300MB
 - b. Sets the *Check For Newer Versions Of Stored Pages* to 'Every Visit To The Page'
 - c. Enables printing of background colors and images
 - d. Enables HTTP 1.1
 - e. Sets Internet Explorer Text Size to MEDIUM
 - f. Sets Trusted Sites Security Level to LOW
 - g. Adds the following sites to the Trusted Sites list and allow
 - *.fnismls.com
 - *.spellchecker.net
 - *.sitexdata.com
 - *.transactionpoint.com
 - *.trpoint.com
 - *.getmedianow.com
 - *.virtualearth.net
 - *.doccentral.com
 - *.rdesk.com
 - *.explorer.net
 - *.xmlsweb.com
 - h. Checks for MSJVM or Sun Java
 - If browser detected is IE 6, disable Sun Java.
 - If browser detected IE 7 or 8, enable or install Sun Java if missing.
 - If IE 8, enable or prompt to install Sun Java if missing.
 - i. If IE 8, turn off Data Execution Prevention for Internet Explorer
4. Internet Explorer print margins are set to .25 for the Right, Left and Top margins, the Bottom is set to .5 for optimum printing of Views and Reports from the system.
5. Checks display settings
 - a. Prompts the user to modify their screen resolution to >1024x768
 - b. Will warn user on:
 - Font Size
 - Font DPI
 - If font set to High Contrast

Important Note: Please inform your membership that the Paragon login icon created and placed on their desktop from the previous System Checker utility must be removed.
